Best use of **MoliCare**[®] products:

Store open and unopened packets at room temperature and away from humidity, as moisture will be attracted to the super-absorbent core in the pad.

Remove pads from packaging at least half an hour before use, to allow the cellulose fibres in your product to 'breathe' and 'fluff up' after storage. This will ensure the product will be at its best before use.

Talcum powders and oil based creams can clog the pad. If required use the MoliCare[®] Skin Barrier cream which is water based and compatible with the MoliCare[®] pads.

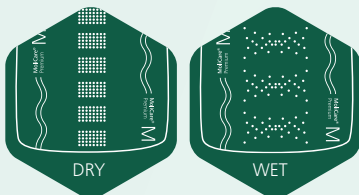

The correct fitting of products is very important to allow them to work correctly. Please see the relevant fitting guides for details on this or contact us for more information.

Use a non-rinse cleaners in between pad changes to reduce the risk of Incontinence Associated Dermatitis. MoliCare[®] Skin cleansers are pH 5.5 skin neutral in order to respect the natural protective barrier of the skin.

Many of the MoliCare[®] pads include a wetness indicator which is integrated into the backsheet of the products. The wetness indicator will blur or disappear as the product is used and is a guide to when the product needs to be changed.

Why choose MoliCare®

Skin-friendly, pH 5.5 ensures maximum skin compatibility. Keeps skin dry with a 3-layer absorbent core and advanced fast dry effect.

Neutralises unpleasant odours, for enhanced well-being

Anatomically shaped large pads with leg elastics for optimum wearing comfort*

Maximum leakage protection for added security based on high quality materials and cuff system.

Soft textile-like back sheet provides comfortable feeling

Approximatively 20% faster application as well as easier and more ergonomic handling for caregivers**

The materials used have extremely low potential to trigger allergic reactions

Wetness indicator on the backsheet shows when it's time to change (MoliCare® Premium Form, MoliCare® Premium Mobile, MoliCare® Premium Slip Maxi and MoliCare® Premium Elastic only)

* MoliCare® Premium Form only

HARTMANN Skintegrity system

The Skintegrity system promotes holistic incontinence management and IAD^[1] prevention. Through the winning combination of the MoliCare® absorbent product range and MoliCare® Skin products, Skintegrity continues to improve the quality of life of people living with incontinence.

Through Curly Fibre technology, a **skin-neutral pH value of 5.5 is achieved in all MoliCare® absorbing products^[2]**.

The MoliCare® Skin product range complements this with products maintaining the acid mantle of the skin through a skin-neutral pH level of 5.5^[3].

[1] Incontinence-associated dermatitis.

[2] Except MoliCare® Premium lady 0.5 drops and MoliCare® Premium MEN 3 drops.

[3] Except body lotion, care oil, hand cream, protection foam, protection oil, zinc oxide cream.
